## INTEGRATED SOLUTIONS

THE ART AND SCIENCE OF BRINGING TOGETHER PLASTICS AND ELECTRONICS.

*Getting your product to market at the right time, in the right package size and at the right price is critical to the success of your business. As the need for package size is reduced, the pressure to keep costs under control continues to increase. This presents designers with even more challenges in developing creative solutions that deliver unmatched levels of performance.*

## Engineering Support

*IntriCon's micromechanics and microelectronics high-density solutions offer an efficient, cost-effective alternative. We ensure customer satisfaction with our proven processes, leading-edge technology and real-world expertise. As your partner, we support you need to determine the best design solutions and to maximize efficiency in your product environment.*

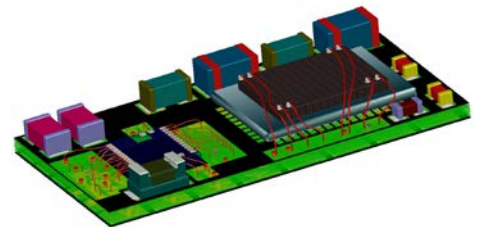

## Your Packaging Solutions

*IntriCon will help you to develop the packaging solutions that meet your needs. We work with your design engineers to speed product development and to help you to ramp from prototype to high-volume production. Our team will evaluate your design and recommend options that reduce cost and optimize quality.*

**If you can benefit from smaller, lighter components or a more cost-effective packaging system, you should be talking to IntriCon.**

*With its compact size, IntriCon's nanoLink™ wireless module is ideal for the miniaturization of body-worn medical products.*
